TRUSTED AESTHETIC ARTISTRY

I, \_\_\_\_\_ am over the age of 18, am not under the influence of drugs or alcohol, am not pregnant or nursing and desire to receive the indicated semi-permanent pigmentation eyebrow procedure. The general nature of cosmetic micro-pigmentation, as well as the specific procedure to be performed, has been explained to me.

» If an unforeseen condition arises in the course of the procedure, I authorize my therapist to use his/her professional judgment to decide what he/she feels is necessary under the given circumstances. I accept the responsibility for determining the color, shape and position of the microblading procedure as agreed during pre-drawing and measuring on day of procedure. I fully understand and accept that non-toxic pigments are used during the procedure and that the result achieved may fade over a period of 1-3 years. Even once the color fades, pigment itself may stay in the skin indefinitely.

» I have been informed that the highest standards of hygiene are met and that sterile, disposable needles and pigment containers are used for each individual client, procedure and visit.  
» I understand and accept that microblading is a process requiring multiple applications of pigment to achieve desired results and that 100% success cannot be guaranteed during the first procedure. I understand that I should return for a repeated procedure.

» The result of the procedure can be affected by the following: medication, skin characteristics (dry, oily, sun-damaged thick or thin skin type), personal pH balance of your skin, alcohol intake and smoking, post procedure after care.

» I understand that with oily skin types, strokes can heal less crisp, expanded and/or blurry and may result in a powder-brow effect.

» Upon completion of the procedure there might be swelling and redness of the skin, which will subside within 1-4 days. In some cases, bruising may occur, but is considered very rare. You may resume normal activities following the procedure, however, using cosmetics, excessive perspiration and exposure to the sun should be limited until the skin has fully healed. Please see after care instructions for more details. The procedure results will look acceptable for you to appear in public without additional make-up on the brows.

» I have been advised that the true color will be seen 6 weeks after each procedure, and that the pigment may vary according to skin tones, skin type, age and skin condition. I understand that some skin types accept pigment more readily and no guarantee on exact color can be given.

» To my knowledge, I do not have any physical, mental or medical impairment or disability that might affect my well being as a direct or indirect result of my decision to have the procedure done at this time.

» I agree to follow all pre-procedure and post-procedure instructions as provided and explained to me by the technician. Failure to do so may jeopardize my chances for a successful procedure. I can confirm that I have received a copy of after care details.

TRUSTED AESTHETIC ARTISTRY

I have been informed of the nature, risks, and possible complications and consequences of permanent skin pigmentation. I understand the permanent skin pigmentation procedure carries with it known and unknown complications and consequences associated with this type of cosmetic procedure, including but not limited to: infection, scarring, inconsistent color, and spreading, fanning or fading of pigments. I understand the actual color of the pigment may be modified slightly, due to the tone and color of my skin. I fully understand this is a tattoo process and therefore not an exact science but an art. I request the semi-permanent skin pigmentation procedure(s) and accept the permanence of this procedure as well as the possible complications and consequences of the said procedure \_\_\_\_\_(initial)

There is a possibility of an allergic reaction to numbing agent and/or pigments. A patch test is offered however it does not ensure a client will not have an allergic reaction. If waived, I release the technician from liability if I develop an allergic reaction to the pigment. **Patch test must be booked at least 2 weeks prior to the procedure!**

\_\_\_\_\_ (initial) I understand that if I have any skin treatments, injectables like Botox or filler, laser hair removal, plastic surgery or other skin altering procedures, it may result in adverse changes to my microblading procedure. I acknowledge some of these potential adverse changes may not be correctable.

I certify that I have read and initialed the above paragraphs and have had explained to my understanding the consent and procedure permit. I accept full responsibility for the decision to have this cosmetic semi-permanent pigmentation work done.

I, (Client Name) \_\_\_\_\_, give Carey Misa, Carey Ink. permission to perform my microblading procedure.

## **MICROBLADING EYEBROWS PRE PROCEDURE ADVICE**

**Please read the following advice carefully and sign at the bottom**

- Microblading procedure normally requires multiple treatment sessions. For best results, clients will be required to return for at least one re-touch appointment. This will take place 6-8 weeks after the initial procedure. Those with oily skin may require an additional touch up. Please be aware that color intensity will be significantly darker and sharper immediately and a few days after the initial procedure, but the color will reduce by 30-50%
- Although numbing cream is used during the procedure, sensitivity or discomfort may still be felt. Skin may be red and/or swollen after the procedure
- Please do not drink alcohol 24 hours prior to the treatment
- Unless medically necessary, please avoid taking things that thin the blood like fish oils, herbals, Vitamin E, aspirins
- A patch test can be performed, unless waived by client. It is the client's responsibility to schedule this at least 2 weeks prior to the procedure.
  
- Please do not shape or wax your brows before the procedure. Your technician will shape brows during the procedure
- No electrolysis for at least 5 days before the procedure
- Botox, AHA products and retinoids should be avoided for 2 weeks prior to the procedure
- Exfoliating treatments such as microdermabrasion should not be performed within 2 weeks prior to procedure
  
- Chemical and laser peels should be avoided no less than 6 weeks prior to procedure
- Patients prone to cold sores/fever blisters should take an anti-viral prior to treatment
- Hormone therapies can affect pigmentation and/or cause sensitivity
- Discontinue use of any brow-growth serums like Latisse, as it can cause sensitivity / affect pigment

### **Topical Anesthetic Advice**

- **Allergic reaction** can occur from any anesthetics used during the procedure. If you do suffer from an allergic reaction, you should contact your doctor immediately. Allergic reaction response may show through redness, swelling, rash, blistering, dryness or any other symptoms associated with an allergic reaction.
- **Numbness** – We cannot accept responsibility if the area to be treated does not respond to the numbing cream. Each individual is different according to skin type. Some clients report the area to be completely numb, while others may experience some discomfort.
- **Procedure** – For microblading procedure, a numbing cream/gel is used. The products are formulated to be perfectly safe and can be purchased over the counter from any pharmacy/chemist. The anesthetic is placed over the treatment area for 30 minutes then carefully removed prior to treatment. As a result of the treatment, combined with the use of the anesthetic, you can expect to experience some redness/swelling that can last 1-4 days. You should always follow your post procedure advice and after care for the best results.

TRUSTED AESTHETIC ARTISTRY

**Contraindications for Microblading**

- Liver disease – high risk of infection •• Pregnancy/Nursing
- Compromised skin near brow area •• Chemotherapy/Radiation •• Skin conditions like psoriasis, dermatitis, etc near the brow area
- **The following medical conditions require a note from your doctor giving consent**

Diabetes Type 1 and 2, high blood pressure, auto-immune disease, thyroid / Graves’ disease. Any other medical condition that causes slow healing or a high risk of infection

**I have read and full understood the above information provided and any risks involved with the use of topical anesthetic and I therefore consent to the use of the anesthetic for the microblading procedure. I agree to follow pre- and post- procedure advice closely**

## **MICROBLADING EYEBROWS DISCLOSURE & RELEASE FORM**

**READ EACH STATEMENT CAREFULLY** – I understand the following completely: (initial each statement)

\_\_\_\_\_ Microblading can last 6-18 months depending on how my skin reacts to the procedure. There may be fading and/or discoloration. **The result may not be what I expected to receive.** I understand this is a semi-permanent makeup procedure that may take numerous follow-ups and touch ups to get desired result. One complimentary touch up is included in the price of today's procedure. I must schedule the touch up for 6 to 8 weeks after my initial treatment. I have read and understand the Fees & Policies sheet.

\_\_\_\_\_ There is no warranty or guarantee made to me as a result of this procedure and the final result cannot be guaranteed. There are no refunds for this procedure, as results will vary and individual results are not guaranteed.

\_\_\_\_\_ I have seen and agree with the pre-draw shape that my artist created. I understand that this is a guideline for the shape and size of my brow design and it may vary slightly once the procedure is done.

\_\_\_\_\_ There may be risks and hazards related to performing this procedure.

\_\_\_\_\_ There may be discomfort and pain during this procedure.

\_\_\_\_\_ There is a possibility of bleeding, swelling, redness and allergic reactions to pigments.

\_\_\_\_\_ Microblading is considered semi-permanent and can/will fade over time.

\_\_\_\_\_ Microblading, though semi-permanent, may last permanently and may not fade.

\_\_\_\_\_ Surgical procedures may be required to remove pigment from skin. These procedures may cause scarring and permanent damage to the skin.

\_\_\_\_\_ Final result cannot be determined until brows are completely healed at 4 to 6 weeks.

\_\_\_\_\_ I understand that permanent and semi-permanent makeup procedures cannot be guaranteed and results cannot be predicted, as there are many variables that contribute to the final result, such as aftercare, skin type, lifestyle, etc. Microblading is not a replacement for a "makeup" look and some clients may still feel the need to fill in their brows.

\_\_\_\_\_ I have received post care instructions and will follow them to ensure results of my procedure are satisfactory.

\_\_\_\_\_ I am NOT pregnant

TRUSTED AESTHETIC ARTISTRY

\_\_\_\_\_ I am NOT under the influence of drugs and/or alcohol or any other mind-altering substance

\_\_\_\_\_ I fully understand the procedure and give permission to my technician to perform the service of Microblading and all procedure and steps involved.

\_\_\_\_\_ I have truthfully filled out the consent form and have informed my technician of all medications I have taken.

\_\_\_\_\_ I release Carey ink., LLC and its representatives and license technicians of all claims and injury, seen or unseen that may occur as a result of this procedure.

Signature: \_\_\_\_\_ Date: \_\_\_\_\_

**MICROBLADING EYEBROWS PATIENT PHOTO RELEASE**

I hereby consent to, and authorize the use by Carey ink. of the specified microblading photographs and/or video; that is, photographs taken before, during and after my microblading procedure.

I understand that my identity will be protected and neither my full face nor my name will be used in conjunction with the photographs and/or video.

Carey ink. has explained that all the photos and/or videos will be clinically appropriate and tastefully presented.

I have agreed on the photographs that Carey ink.requests to be used and it is understood that these photos may be used on Carey ink. web site, social media accounts (Facebook, Instagram), and in-office for demonstrational and promotional purposes. I understand that I am not entitled to compensation for these photos being used.

Should I desire to revoke permission for their use in the future, I understand that I must notify Carey ink. in writing and allow 30 days to accomplish this removal.

I now release Carey ink., and anyone authorized by Carey ink., all personal rights and objections I have or may have to the above described uses of my photographs and/or videos. I have entered into this release freely or voluntarily, and agree to be bound thereby.

## MICROBLADING EYEBROWS FEES & POLICIES

Please read thoroughly and carefully and initial or sign where indicated.

- The cost of the microblading procedure is \$525 – includes the initial session and touch up 6-8 weeks later. (any promotional pricing will be noted on website or by invoice)
- A \$100 deposit fee is required to schedule your microblading, but will be applied toward your final total. This is **non-refundable** as we are reserving a large time slot especially for you. Please do not book this appointment if you are not **100% sure** that you want to have this procedure done! It is okay to take your time to think about it! If you do book the appointment and **cancel** for any reason, your deposit fee will **NOT** be refunded if notice is not given within 3 business days prior to your appointment. We understand that schedules sometimes change. If you need to **reschedule** your microblading appointment for any reason, you may keep your deposit on the appointment **if we are given 3 business days notice**. If we do not have 3 business days notice, **we will unfortunately need to collect another \$100 deposit** to schedule another session, as a short notice rescheduling does not give us enough time to fill the spot.
- Scheduled appointments for the touch up procedure require **48 hours notice for cancelation or rescheduling!** The touch up service is included in the original price when performed within 3 Months after the initial session. Outside 3 Months, you would need prior assessment from your technician, as in some cases an initial touch up may not be needed for up to a year.

\_\_\_\_\_ I acknowledge that I have read and fully understand the policies.

\_\_\_\_\_ I understand that if I cancel this appointment, I will not get the \$100 deposit fee back.

\_\_\_\_\_ I understand that if I need to reschedule the appointment, I need to give a minimum of 3 business days notice, otherwise I will be required to pay an additional \$100 deposit fee to re-book the appointment.

By signing this form, I am acknowledging that I have read and fully understand the policies. Any questions I have regarding the policies have been answered and explained to me.

## **AFTER CARE INSTRUCTIONS & WHAT TO EXPECT**

Please follow these instructions for 14 days after the procedure to improve and prolong the results of your microblading. If you don't follow these instructions, it can greatly affect your microblading results or put you at risk for infection, scarring or loss of pigmentation!

**Avoid getting anything on the brows, including water, except as directed.**

**Day 1 :** Right before bed, gently wipe your brows with a damp cotton pad and recoat with aftercare balm by gently gliding it on the brows with a clean Q-tip. If they look too saturated, use a tissue to carefully blot the excess.

**Day 2 - 14:** Repeat this procedure, very gently every morning and night. If you have oily skin, use aftercare only twice per day. If you have normal to dry skin, apply aftercare throughout the day as needed, when brows feel dry. Do not overuse aftercare. Do not pick or rub the brows. The scabs/flakes must fall off on their own or you will risk removing the color and possibly scarring.

- **DO NOT** get the brows wet other than with damp cotton pad. Do not soak the treated area in the bath, pool or hot tub. For 30 days, refrain from swimming in salt water or chlorinated pools, saunas, hot yoga, steam rooms or sun beds. Avoid hot, steamy showers.
- **DO NOT** sweat for 10 days. This means no exercising that causes sweating.
- **DO NOT** expose treated area to direct sunlight. After healed (30 days), use a sunscreen to avoid fading from the sun.
- **DO NOT** apply makeup to the brow area during the healing process. After the brows have healed (14 days, OR after the scab/skin flakes off) you may wear brow makeup if needed.
- **DO NOT** sleep on your face, try to sleep on your back.
- **No other products should touch the brows during healing, other than the after care balm and wiping them gently with a damp cotton pad once per day.**
- **Do not touch, rub, pick or scratch** your brows following treatment or during healing process.
- If your eyebrows get wet during the healing process, pat them dry with a clean tissue, **DO NOT RUB.**
- Avoid using daily skincare products directly on the eyebrows.
- Wait 2 weeks before having waxing or tinting. Please inform therapist of the procedure you have had.
- If you are due to give blood after the procedure, please inform your nurse about the microblading treatment you have had as this might alter the results.
- If brows become painful, red or oozy, please see a physician. This could be signs of an infection. It is normal to be sore and red right after, but if it persists and gets worse, this is cause for concern.
- Call or email me with any questions or concerns – 541-903-1913 – [carey@careyink.com](mailto:carey@careyink.com)

TRUSTED AESTHETIC ARTISTRY

**WHAT TO EXPECT**

Initially, your brows will appear more bold than usual. Over the next few days after the procedure, your brows may darken during the healing process. This is normal and this is not the way they will remain. Around 7-14 days, you may notice some flaking/shedding of the skin near the brow area. Think of this as very small “scabs” falling off the skin now that the skin underneath has healed. You may feel they appear uneven at times because of this. When the skin flakes off, many times the microblading strokes appear very light or sometimes it seems that they have disappeared. **THIS IS NORMAL!** This is because there is still a thick layer of protective, opaque skin creating a veil over the pigment. Once you go through a skin cycle (4-6 weeks) the pigment will typically reappear but will be about 30-50% lighter than it was immediately after the procedure.
